Graham Van Tighem  
Executive Director  
Yukon Fish and Wildlife Management Board  
Box 31104  
Whitehorse, YT Y1A 5P7

Dear Graham Van Tighem:

**RE: Yukon State of the Environment Interim Report 2021**

On behalf of the Department of Environment, I am pleased to announce the recent release of the Yukon State of the Environment Interim Report 2021.

The Yukon State of the Environment Report is an annual publication that brings together scientific and technical data to identify trends about the health of the Yukon's environment, dating back to 1995. The report provides updates on research and monitoring efforts for climate change, air, water, landscape and fish and wildlife in the Territory.

I am sharing copies of the enclosed report with the Yukon Fish and Wildlife Management Board, which plays an integral role in supporting the management of fish and wildlife in the territory. For convenience, a digital copy is also available for download on [Yukon.ca/en/state-environment](https://www.yukon.ca/en/state-environment).

Sincerely,

Nils Clarke  
Minister of Environment
